Skills

- Web development
- Empathy
- Problem-solving
- Teamwork
- Attention to detail
- Assertiveness
- Effective communication

Experience

Coding Events *(May - 2023)*
I participated at a coding event where our team developed an application called **"Moving box"** the main goal of this application was to make an invetory of the items contained in a box in order to able to know what items certain box contains by just scanning a QR code. My task for this project was to give functionality to the user interface made by other team members. The Tecnologies we used to develop this web application were ***ReactJs, Tailwindcss, Firebase.***

Personal Projects
Developed small projects such as a ***Simple Inventory Software, Netflix clone (UI), rock paper scissors, Word finder to-do list,*** etc, in order to grasp the concepts I learned. For more refer to my GitHub account by clincking the following url: **github.com/yohanangulo**.

Education

- **Coding Bootcamp -** Lexpin *(Venezuela)* - **(Nov. 2022 - Present)**

- **Associate's Degree in Computer Science** - Universidad Politécnica Territorial (Venezuela) - **(2019 - 2020)**
  Completed 1 year out of 2 for the degree program

- **Electronic Engineering** - Universidad Jose Antonio Paez (Venezuela) - **(2016 - 2018)**
  Completed 2 years out of 5 for the degree program

Languages

- **Spanish** (Native)
- **English** (B2)
